

PPT Topics

EE/ETC/EC

- VLSI & Embedded System
- Signal & Image Processing
- Wireless Communication
- VHDL
- Nano Technology

CSE/CE/CT/IT

- Internet of Things
- Cloud Computing
- Web Mining
- Big Data
- Artificial Intelligence
- Mobile computing
- Network security/network analysis

Applied Science

- 'Renewable energy' current status and future challenges
- Green chemistry and its role for the sustainability
- Analysis of solar thermal power generation
- Aqua Voxx-non-nuclear, non-solar or wind based technology
- Solid waste management
- Wind energy system controls
- Recent Trends in Civil Engineering
- Green building for sustainability

Electrical

- Renewable energy sources
- Power Electronics & Drivers
- Power system & Power quality
- Application of soft computing in electrical enng.
- Electrical Drivers

M.B.A.

- Team work verses individual responsibility
- Role of business or industry in society
- Role of leadership in management
- Impact of technology on bussiness

Mechanical

- Recent Trends in mechanical enng.
- Manufacturing science
- Mechatronics
- CAD & CAM
- Nano Composition
- Mechanical designs
